

Notes 12/13

Laura LaBarge

12/13/2021

-trying to finish up akdes before vacation

-meet with Maria to talk about acoustic data @ 1400

-need to find a way to calculate CDE by different individuals - might not be possible :(- subsetted data into two-year bins and put these on movebank. Subsetting in ctm is really not working well at all so this is the last option

after many failed attempts. seems so simple. - need to update georeferencing methods before mid-January. . . .
